Why can't you take the chord shapes we already know and move them up and down the fret board?

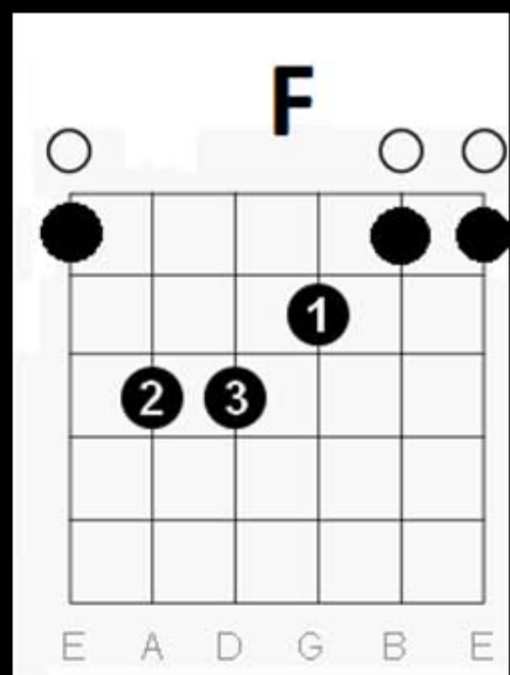

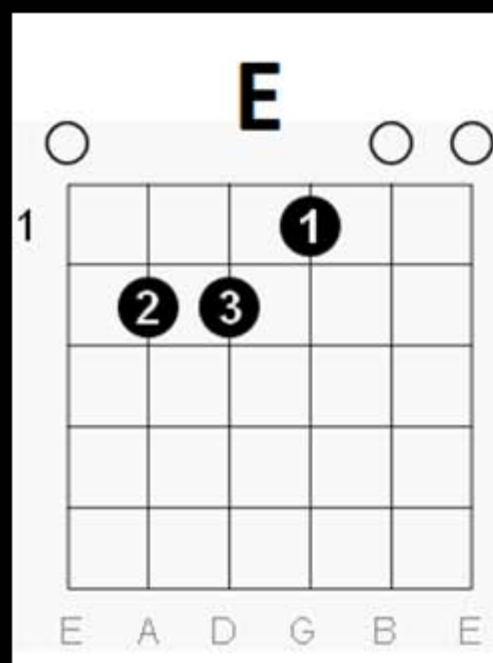

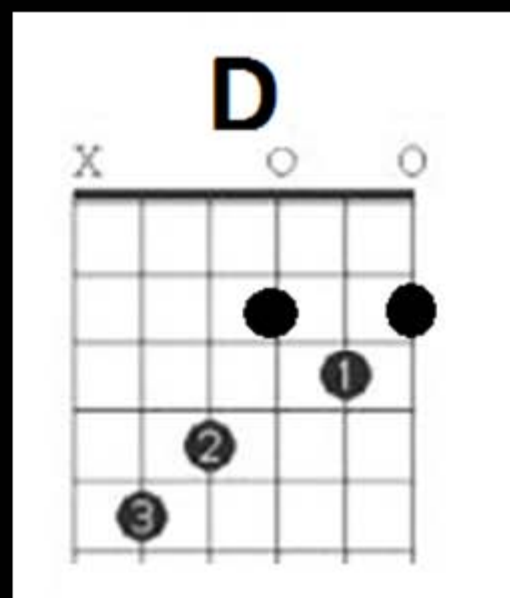

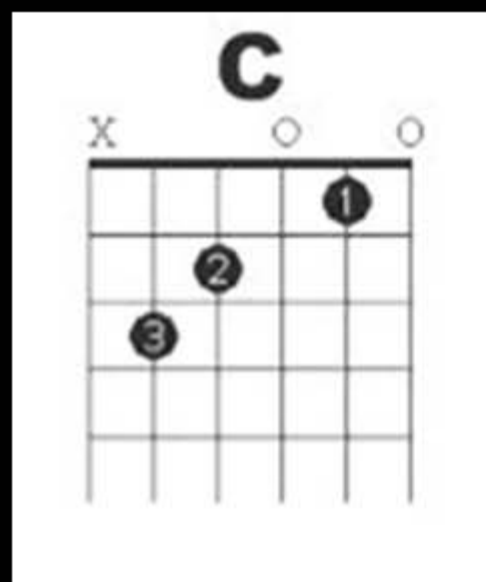

Answer: You can! (Kind of)

(Wrong)

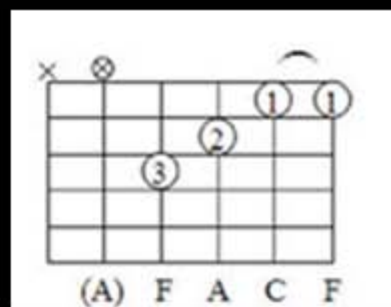

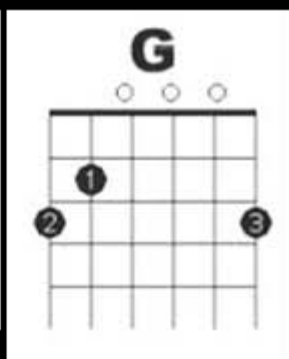

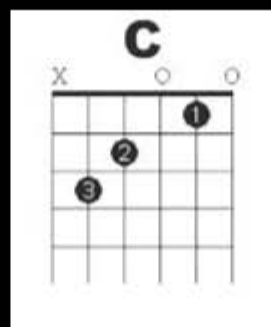

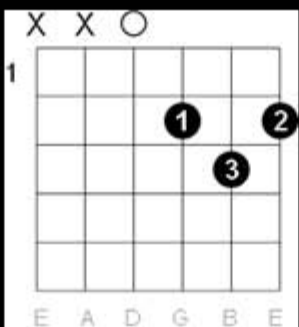

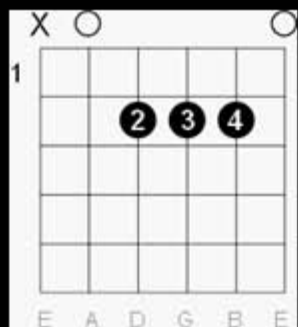

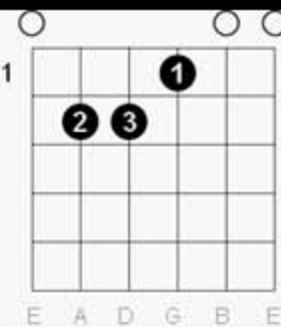

(Right)

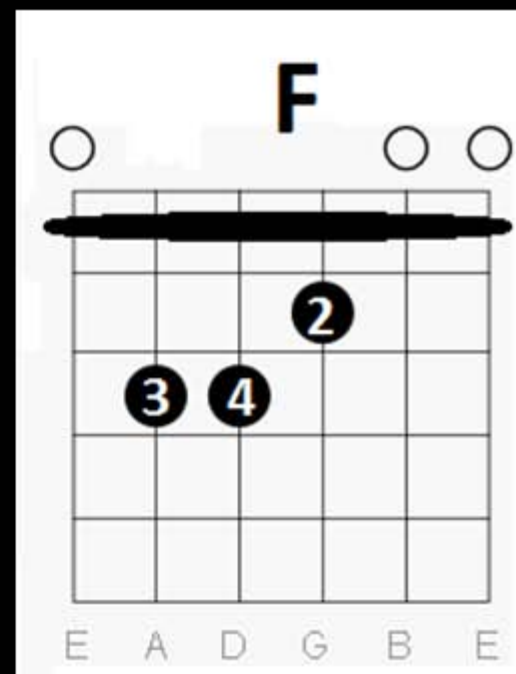

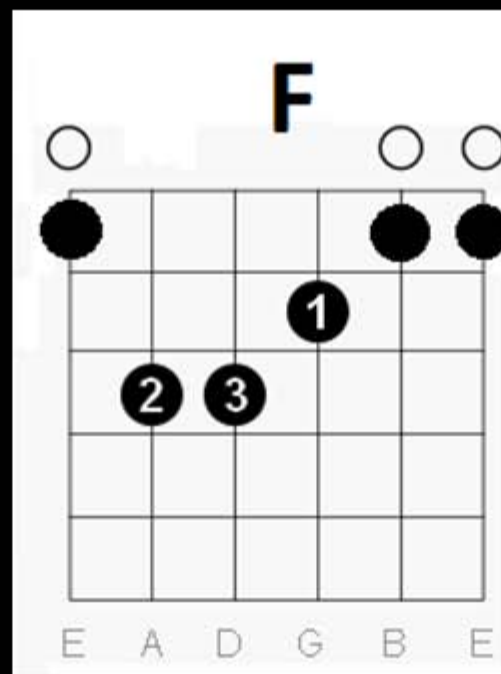

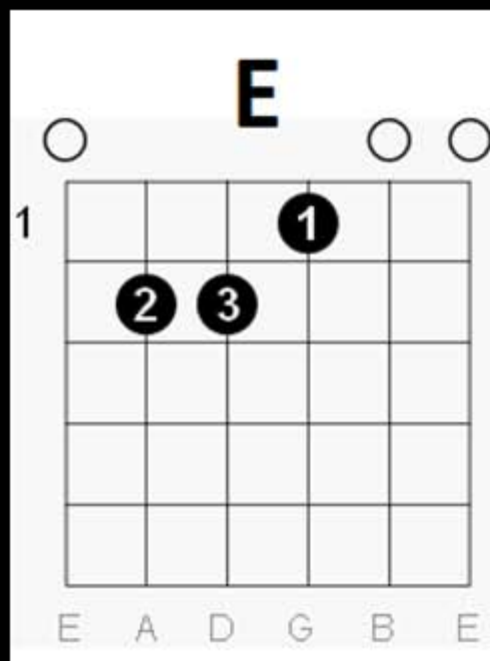

Why don't we just take the easiest chord shape and move it up and down the neck?

- Easier and faster than moving your fingers for different shapes
- Don't have to memorize all these fingering shapes

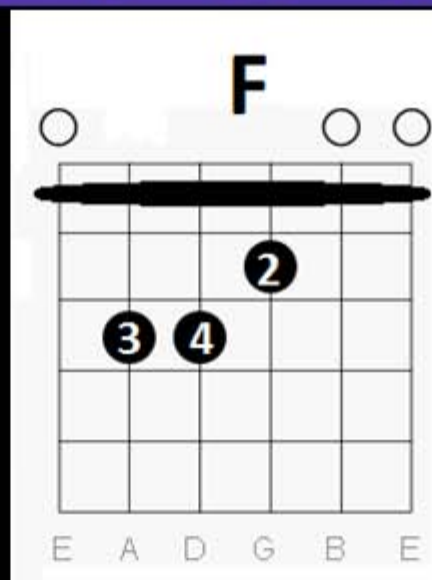

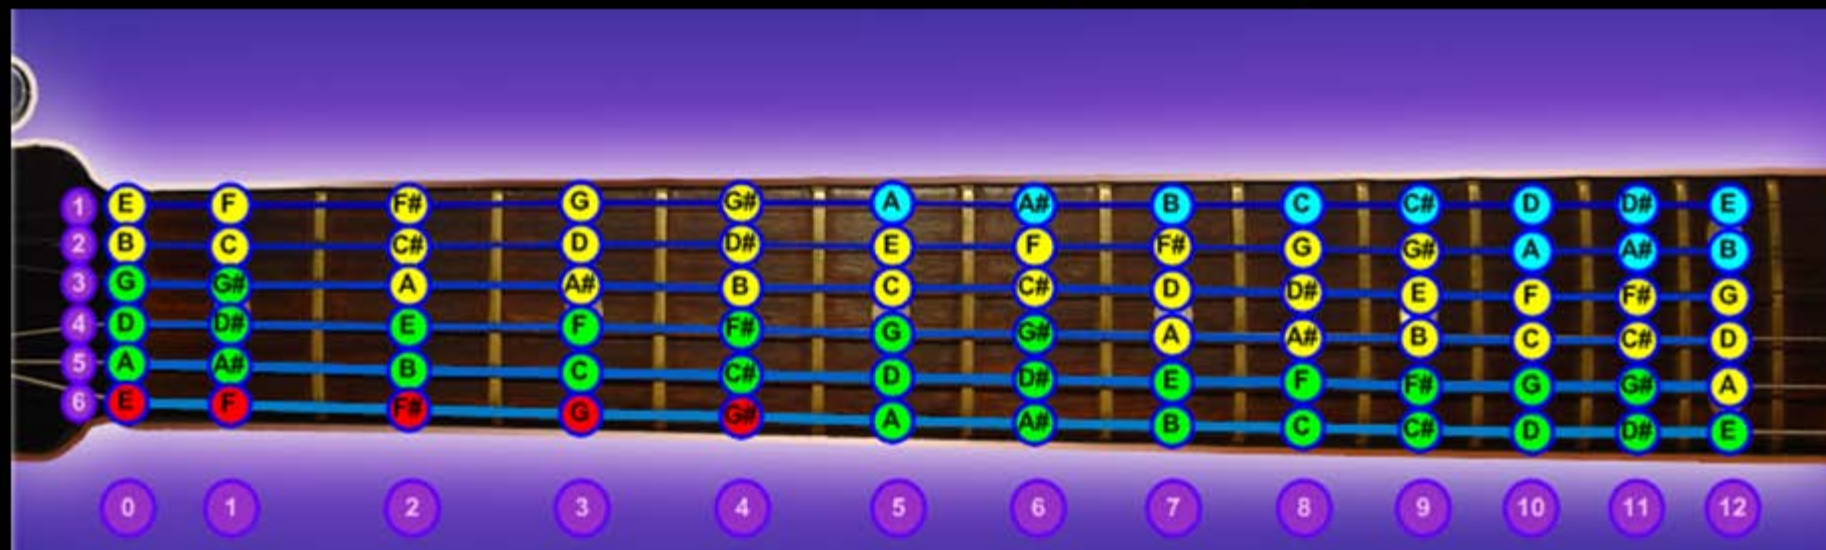

We don't have enough fingers!

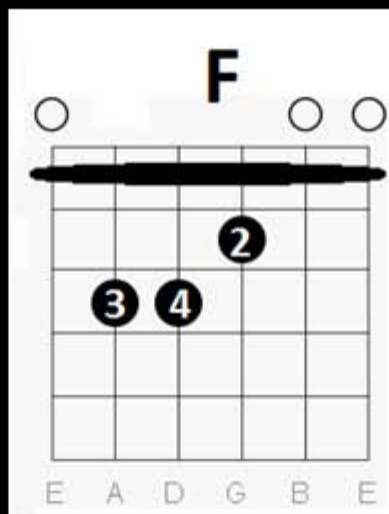

Solution: Use Barre!

You can move this shape up and down the neck to make any major chord!

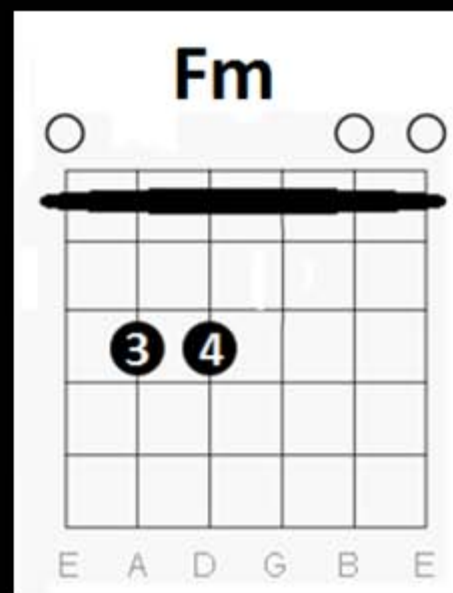

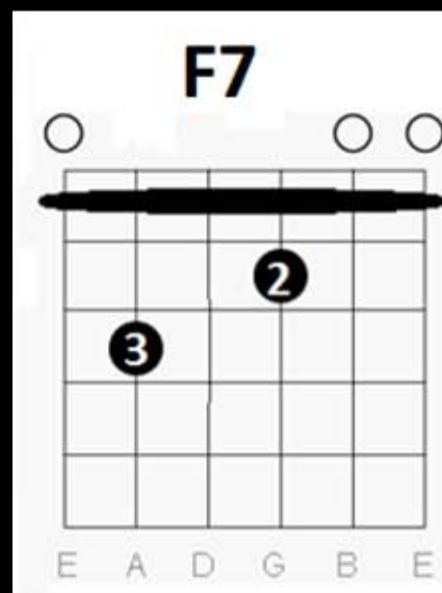

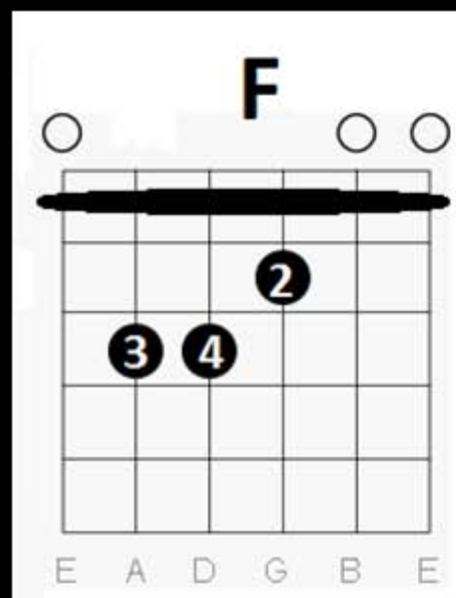

Example- Brown Eyed Girl Rehash

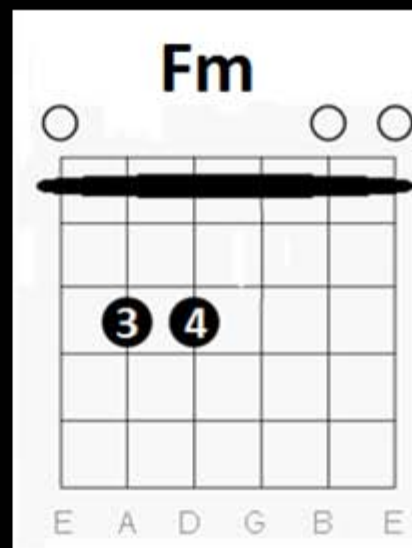

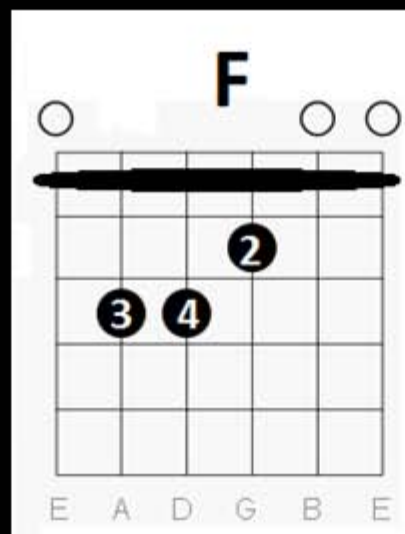

G—C—G—D

6th string fret roots- 3—8—3--10
